Scotertech are proud to manufacture premium mobility and leisure vehicles, expertly engineered to provide robust and reliable performance, capable of longer distances and more frequent use. Our industry renowned Twin Motor Technology enables our powerful vehicles to cope with more rugged terrain with ease. Built using only the highest quality components, our vehicles conform to the most rigorous standards of medical device safety testing. Scotertech were one of the first manufacturers to supply vehicles with an additional emergency braking system, now a legal requirement for all new models of mobility vehicles within the EU. Our carefully developed, high quality vehicles are easy to use and maintain, offering comfort and confidence for every journey.

Our Extreme+ mobility vehicle is a much-anticipated new addition to our product range. It features a new design floor pan to provide maximum extra legroom, the ultimate freedom for users with stiffer and/or longer limbs. The Extreme+ also has a host of additional features: an automatic speed sensor for safer cornering, additional emergency stop function, brighter lighting system with two front LED headlights for maximum visibility, PLUS 2 USB ports to charge peripherals on the go.

The new EXTREME+ comes with convenient multi-adjustable steering, warm feel levers, powerful motors & gearboxes, quality carpets & fittings, the standard for all our vehicles. Front & rear suspension provides a smooth, responsive and comfortable ride. The ABS colour-through plastics won't chip or peel and are easy to maintain, and the control panels are responsive and easy to use.

To compliment your lifestyle, this rougher terrain vehicle provides exceptionally reliable transportation for years to come for your LIFE Without Limits.
